

### Summary

#### Changer for CD and/or DVD disks

5

A changer for CD and/or DVD disks generally includes a drawer slidably mounted within a chassis of the changer and supporting a number of disk plates arranged one above the other and each holding a disk therein.

10

It is an object of the invention to provide a changer of this kind modified in such a way that the user can access all disks inside the changer and access all disks except disks which are in a playback position by a pick-up or an equivalent reader.

15

The disk plates (7) are each mounted at one end via a hinge (9, 10) at the drawer (3) in such a way that they are pivotable about a horizontal axis of the chassis (1) of the changer.
